In 2018 Alpinestars is ruling motocross and supercross the world over. In the United States of America, Jason Anderson won his first Monster Energy Supercross Championship, while Eli Tomac strung together his second consecutive AMA 450MX National Championship. In the meantime, the three-time MX2 World Champion Jeffrey Herlings was able to further bolster his legend by claiming his first MXGP World Championship.

Leading the world's three elite championships in '18, Anderson, Tomac and Herlings have all been triumphant in Alpinestars technical riding apparel, footwear and protection.

"Alpinestars defines protection in motocross," says Jeffrey Herlings. "They always push development to make things better for the riders and it's an honor to use Alpinestars racing gear. Alpinestars is the top brand in the motocross industry and I'm proud to be able to use Alpinestars as my racing gear because it's not only a very good looking brand, but also a brand that provides great comfort and protection as well. I am a proud Alpinestars rider."

56 years in the making, Alpinestars evolved into a motocross protective company when a leather craftsman from Asolo, Italy, named Sante Mazzarolo gleaned what he had taught himself from creating innovative hiking and ski boots and incorporated his knowledge and experience into specialized, purpose-built boots for motocross that were revolutionary for the time.

And just like the sport of motocross during the late 1960s, Alpinestars grew and evolved at an astonishingly quick pace.

"I remember when Sante Mazzarolo first came to me with one of his first MX boots in the early 1960s," explains Roger DeCoster, a five-time Motocross World Champion who has accomplished and done so much in the sport that today, even five decades after his first world title in 1971, he is still simply referred to as 'The Man'. "Sante had so much passion and confidence about making the best boot possible! Now, almost 50 years later, it is impressive to see what Alpinestars has accomplished in motocross and supercross. It is probably not a coincidence that the top riders in the world like Herlings, Tomac and Anderson are all in Alpinestars. Now, under the guidance of his son Gabriele, whose intensity for quality and innovation supersedes that of his Dad, the company's momentum in making revolutionary new protection products is incredible. You know, for me, it feels real good to have been a part of A-Stars in the early days of a brand that has become synonymous with success in every category of motorsport from MX to Formula 1."

The 2019 Alpinestars Motocross/Off-Road Collection is bristling with high performance products, innovation and futuristic thinking all researched and developed by Alpinestars' world class riders. A racing company through and through, Alpinestars goes to the starting gate every Saturday night or Sunday afternoon with absolute pride and confidence in absolutely everything we do and anything that we create.

Like Jeffrey Herlings says, Alpinestars defines protection in motocross.

Alpinestars.

Top Athletes in the history of Motocross.

One Goal.

One Vision.

T H I N K I N G A H E A D

The all new Supertech M10 helmet is the result of over five years of intensive study, development and testing. Based on Alpinestars' five decades of protection development, we scrutinized every possible aspect to engineer a helmet that is safer and more thoughtfully designed than anything else.

S T E P P I N G A H E A D

Footwear is what built Alpinestars. It's where we laid the foundation for innovation in everything we do. Over a decade of success and refinement with the Tech 10 wasn't enough for us. We needed to continue to move forward. The all new Tech 10 is completely re-engineered from the ground up to provide a safer, lighter and more comfortable experience on the bike. We will never rest, we will never stop pushing ahead in everything we do.

F U R T H E R A H E A D

Relentless innovation and a desire to protect every aspect of a rider. We strive to provide the best level of protection possible for all of our riders. The Bionic 10 Carbon knee brace is ultra light and extremely supportive. Whether the protection is worn inside or outside of your gear, Alpinestars has you covered.

HELMETS

META - ECE

- Lightweight outer shell is constructed from technologically advanced carbon in four sizes for best fitting. ECE 22/05 certifications.
 - Multiple density inner liner.
 - Fitted with E-2, latest generation of MIPS, integrated low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.
 - Visor attached to helmet shell with patented system that will allow easy release in case of crash.
 - Adjustable top pad height (Alpinestars' patented A-Head system).
 - Maximized ventilation with 19 intakes and 5 exhaust ports.
 - Side shell shape coupled with soft EPP foam prevents damage to collarbone in event of crash.
 - Emergency release and removable cheek pads, 3D contoured foam.
 - Removable comfort liner, anti-moisture and anti-bacterial fabrics.
 - Hydration prepared.
 - E-Ject prepared.

APPAREL

SUPERTECH

JERSEY

- Ultra-lightweight advanced fabric main construction for moisture-wicking and performance fit.
- Jersey features a more fitted, lightweight design.
- Chassis consists of stretch mesh chassis with open mesh inserts on arms and side torso for high levels of cooling airflow.
- Innovative, fully floating arm construction offers full freedom of movement.
- Neck and sleeves feature fully tape-welded hems for reduced weight and improved levels of comfort.
- Pre-curved sleeves for maximum comfort and performance.
- Extended rear design helps maintain perfect riding fit.
- Sublimated fade-resistant graphics.

PANTS

- Meticulously designed to a new pattern fit to keep pants perfectly positioned while riding aggressively and to offer unrivalled levels of movement and flexibility.
- Main shell extensively constructed (80%) from advanced stretch fabric for freedom of movement. Textile fiber composition specifically developed by Alpinestars to offer high levels of mechanical properties, such as strength, elasticity and durability.
- Heavy (900 denier) reinforcements on seat area provide seam strength, durability and critical coverage.
- Strategically positioned stretch mesh inserts offer cooling comfort and freedom of movement.
- Leather panels on inner leg provide heat resistance, grip and comfort.
- Ratchet waist closure system and waist adjustments offer precise, personalized and secure fit. Waist incorporates stretch inserts for adaptive fit and comfort.
- The front fly safety closure system features a metal hook for additional security.
- TPU reinforced knee area and on back for lightweight abrasion resistance.
- Welded hems on leg strength and reduced weight. Leg cuffs also features stretch insert for easy on and off.
- Advanced poly-fabric mesh lining offer comfort and internal cooling.
- Interior brushed effect for excellent skin-contact comfort.

PANTS

- Multi-panel, poly-fabric construction with PU coating for excellent strength and durability.
- Innovative, strategically positioned four-way stretch panels for freedom of movement and riding fit.
- Localized perforation zones allows for cooling airflow and comfort.
- Exclusive "Vector" back panel provides maximum comfort and flexibility when riding.
- "Babel" knee design features a pre-bent, reinforced and padded 3D knee construction with hidden stretch spandex expansion gusset for excellent fit in the riding position.
- Heavy poly-fabric reinforcement on the seat area provides high levels of abrasion resistance.
- Lightweight and ventilated mesh lining with stretch panel insert for better fit in riding position.
- Leather panels on the inner leg provide heat resistance, grip and comfort.
- 3D injection molded rubber logos and details for additional durability.
- Silicon webbing on inner waist helps keep garment in position.
- Inner hip pocket for safe key/coin storage.

GRAPHITE & TACTICAL

JERSEY

- Poly-fabric construction is lightweight, moisture-wicking and durable.
- Cut longer in the rear area for compatibility with Alpinestars MX pants.
- Stretch collar neck construction for fit and comfort.
- Fade resistant sublimated graphics.
- Fitted wrist cuffs for optimized fit.

PANTS

- Durable poly-fabric/mylon construction that is PU coated for additional strength and durability.
- Soft stretch back panel from the upper thigh to the bottom of the leg provides increased comfort and flexibility.
- Internal comfort liner made of an extensive lightweight mesh with stretch panel inserts for improved feel and function.
- Pre-curved, ergonomic leg construction for improved performance in the riding position.
- Heavy poly-fabric reinforcement on the seat area and inner leg panels provides superior abrasion resistance.
- Leather reinforced inner-leg panels for heat resistance, grip and comfort.
- Innovative 3D knee construction and expansion panel designed to accommodate knee protectors.
- 3D injection molded rubber logos for durability.
- Ratchet closure with dual waist adjustment pull-tabs for safe, personalized fit.
- Convenient interior hip pocket for key/coin storage.

BIONIC-10 CARBON KNEE BRACE

- Knee protector - EN 1621-1:2012 Level 1.
- Structural hybrid frames are constructed from a composite over-injected with a high performance fiber reinforced polymer which provides optimal structural integrity and support while being ultra-lightweight.
- The Bionic-10 Carbon Knee Brace comes in 4 different sizes: S, M, L and XL/2XL for perfect fitment.
- The asymmetric frame design ensures a wide range of unique leg shape compatibility and a perfect fit.
- Slim ergonomic design offers a high level of riding comfort during dynamic movement.
- The open structure and perforated areas promote maximum ventilation.
- Extremely stable slim-design 4-point hinge system perfectly follows the articulation of the knee.
- Hinge system incorporates easily exchangeable extension stops (0, 5, 10, 15, 20, 25 and 30 degrees) which reduces the risk of sustaining injuries to:
 - The medial and lateral collateral ligament
 - The anterior and posterior cruciate ligament
 - The lateral and medial meniscus
- New patent pending lightweight and highly ventilated double-wall knee-cup system offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.
- The ergonomically sculptured triple segment knee cup is designed for flexibility and adaptivity and constructed from a double density polymer solution for high impact force dispersion on rigid external shell and energy absorption on semi-rigid internal shell structure.
- The knee cup is accurately secured in place by an innovative integrative mechanical guiding system that keeps the knee cup in correct position while providing controlled freedom of movement.
- The newly developed Calf Frame strap system holds braces perfectly in position and avoids slipping down when rider is in action and extreme movement.
- The two calf straps are linked with a semi-rigid C-shaped connector that dynamically shapes towards the dimension change of the calf muscle.

SX-1 KNEE GUARD

- Knee protector - EN 1621-1:2012 Level 1.
- Extremely lightweight knee protection with large protective area for riders looking for most breathable and lightweight solutions on all riding styles.
- Upper and lower frames are constructed from a high performance polymeric material blend for optimized levels of flexibility and strength as well as excellent weight saving properties.
- Polymer protector plates are strategically perforated for maximum breathability and air ventilation.
- The upper and lower frame integrated dual pivot hinge gear system follows the natural

movement of the knee and keeps the protector well positioned during all movements.

- Upper extended frame for increased thigh protection without compromising mobility.
- Innovative knee cup system features "floating" protection cup for continuous coverage and mobility regardless of leg position.
- Knee cup system constructed from energy absorbing viscoelastic PU foam that is CE certified to Type A.
- Knee cup system is backed by soft padding for adaptive fit and breathable air mesh for ventilation and comfort.

- High abrasion resistant fabric with an over-injected TPU frame structure on outer central knee cup area to improve impact performance.
- Thermoformed foam backing for excellent comfort against the skin.
- Frames are asymmetrical and feature a slim, ergonomic design for comfort and performance fit.
- Hook and loop dual strap closure system with silicon Pull Tabs for easy in and out and a personalized, safe fit.
- Available in sizes: S/M - L/XL - 2XL.

BNS TECH-2

- Category 2 PPE - CE certified under EU Regulation 2016/425.
- Complete new design and technical evolution including new lightweight rear section, chest padding and updated chin-plate design.
- Structural integrity and frame strength against heavy impact energies during a crash.
- Ultra-lightweight performance and comfort while riding.
- Reduced weight with no compromise on strength and rigidity.
- Resilience to low temperatures, below 0°C.

- Designed to provide a customizable, secure and personalized fit with the SAS (Size Adapter System) for a versatile fitment in size ranges XS-M and L-XL.
- The Lycra®-laminated foam padding kits are adaptable and the interchangeable EVA foam pads allow compatibility with body protection systems.
- The lightweight Strap System can be worn over or under the jersey.
- Incorporates a bio-organic engineering design for superb ergonomics: the rear stabilizer promotes PFR (Progressive Force Relief) and dissipates energy loads by transmitting them across the back and shoulders and away from

- spine (thoracic vertebrae), and is connected to the frames via pivot key.
- Frame construction promotes improved contact with helmet during impact – including rear support edge that fits closer to the body, extra width to account for different helmet sizes and raised chest to reduce hyper-flexion.
- Innovative quick-release locking system for rapid and efficient fitting/removal offers secure and convenient closure.
- Compressed EVA foam compound padding to distribute the impact force over the widest area, yet remain lightweight.

SEQUENCE ELBOW PROTECTOR

- Elbow protector - EN 1621-1:2012 Level 1.
- Designed to provide maximum protection on high impacts and to cover a high protection area. The plastic shell construction provides high force dispersion while the integrated grid pattern is designed to absorb high energies.
- All components are engineered to offer a highly reduced material construction to create a protector that is extremely lightweight, slim and highly ventilated.
- Technical elastane stretch mesh main construction is highly breathable and retains shape and structure, while keeping the protector close to the body for highly effective protection performance.
- Plastic shell design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure.
- Constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties. This protector incorporates a strategically positioned viscoelastic cup insert to protect joint extremity and help promote improved fit.
- Ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- Elbow protector shell features an additional soft TPR section for extra coverage and to help keep the protector in position.
- All plastic shells are mounted on padded perforated panels which offer an enhanced fit and skin-touch comfort.
- Dual strap hook and loop grip closure system offers secure fitment of protection while allowing for unrestricted freedom of movement. Straps include silicone pull tabs for convenient closing while wearing gloves.

BIONIC PLUS ELBOW PROTECTOR

- Elbow protector - EN 1621-1:2012 Level 1.
- CE-certified protection systems utilizing robust protective structures and impact absorption padding.
- Highly ergonomic design improves streamlining while providing crucial protection for MX and off-road riding.
- Double closure system on elbow protectors specially designed to offer more comfort and adjustment, with top strap mounted above the elbow and lower strap positioned for ergonomic fit.
- Asymmetrical and lightweight ergonomic panel construction offers extended protection surfaces to reduce rotation.
- Vented outer shell and 3D mesh material give comfort to the rider, preventing heat build-up while maintaining tactile contact with skin.
- Designed with a flexion channel through the shell that allows the shell to bend with the elbow.

A-10 FULL CHEST PROTECTOR

- Back protector - EN 1621-2:2014 Level 2.
- Chest protector - prEN 1621-3:2016 Level 2 (Full chest).
- Shoulder protectors - EN 1621-1:2012 Level 2.
- Back and chest protectors feature embedded grid technology under the shells which absorbs and dissipates impacts forces.
- Grid technology cell system enables greater flexibility and air ventilation while allowing for significantly reduced weight. Protector plates are CE certified.
- Plastic shells are constructed from a high performance polymeric material

blend for optimized flexibility and excellent weight saving properties.

- Plastic shells feature perforation zones and air channelling for excellent breathability and ventilation.
- Modular design to allow for addition of BNS neck support.
- Removable back puck for BNS compatibility.
- Removable upper front panel for BNS compatibility.
- Silicon BNS pull tabs for convenient and safe engagement of the BNS.
- Modular design means the protector can be worn in various configurations

allowing rider to use it in different riding situations and environments.

- Removable EVA padding on biceps with a locking system on the shoulder pad keeps the shoulder protector in the correct position.
- Thermoformed padded chassis for maximum comfort and personalised, close-to-the-body fit.
- Side adjustable kidney belt allows for various fit sizes and ensures protection remains close the body at all times.
- Features Alpinestars quick release attachment system for convenient in and out.
- Comes in international sizes XS/S - M/L - XL/2XL.

A-10 CHEST PROTECTOR

- Back protector - EN 1621-2:2014 Level 2.
- Chest protector - prEN 1621-3:2016 Level 2 (Full chest).
- Back and chest protectors feature embedded grid technology under the shells which absorbs and dissipates impacts forces.
- Grid technology cell system enables greater flexibility and air ventilation while allowing for significantly reduced weight. Protector plates are CE certified:
- Plastic shells are constructed from a high performance polymeric material blend for optimized flexibility and excellent weight saving properties.
- Plastic shells feature perforation zones and air channelling for excellent breathability and ventilation.
- Modular design to allow for addition of BNS neck support.
- Removable back Puck for BNS compatibility.
- Removable upper front panel for BNS compatibility.
- Silicon BNS pull tabs for convenient and safe engagement of the BNS.
- Modular design means the protector can be worn in various configurations allowing rider to use it in different riding situations and environments.
- Thermoformed padded chassis for maximum comfort and personalised, close-to-the-body fit.
- Side adjustable kidney belt allows for various fit sizes and ensures protection remains close the body at all times.
- Features Alpinestars quick release attachment system for convenient in and out.
- Comes in international sizes XS/S - M/L - XL/2XL.

A-4 CHEST PROTECTOR

- Stone shield - EN 14021:2003.
- Back protector - EN 1621-2:2014 Level 1.
- Stone shield and back protectors are constructed from a high performance poly-material blend for optimized flexibility and excellent weight saving.
- The protector plastic shells are perforated for maximum breathability and cooling ventilation.
- Adjustable elastic strap incorporates thermoformed perforated rib protection panels for high levels of protection without compromising movement.
- Elastic closure system features a newly designed, quick and easy-to-use buckles that fit a broad range of rider body types.
- Thermoformed padded chassis for optimized levels of comfort and close-to-the-body fit.
- Modular design means A-4 is optimized for use with BNS neck braces.
- Removable back puck for BNS neck support compatibility.
- Silicon BNS pull tabs for easy and safe engagement of the BNS.
- Removable and adjustable shoulder pads for size regulation with integrated BNS silicon pull tab.
- Additional thermoformed EVA tail extension for extended coverage to the coccyx area.
- Comes in international sizes XS/S - M/L - XL/2XL.

SEQUENCE CHEST PROTECTOR

- Back protector - EN 1621-2:2014 Level 1.
- Stone shield - EN 14021:2003.
- Soft shells are constructed from a high performance lightweight thermoformed material blend that is soft and flexible yet offers the same level of protection as a hard shell protector.
- Shells feature perforation zones and air channeling for excellent breathability and ventilation.
- Thermoformed textile used for the construction are highly

- abrasion resistant and will not easily get scratched.
- Constructed with a soft 3D mesh on the body side of the protector that offers extra comfort and breathability.
- Removable back puck for BNS compatibility.
- Silicon BNS pull tab for convenient and safe engagement of the BNS.
- Thermoformed padded chassis for maximum comfort.

BIONIC TECH JACKET

- Elbow and shoulder protectors - EN 1621-1:2012 / Level 1.
- Back protector - EN 1621-2:2014 / Level 2.
- Chest protector - prEN 1621-3:2013 / Level 2.
- Shoulder and elbow PU foam protectors feature a soft formulation and channelling design for more flexibility and airflow.
- The chest and back protectors feature Grid technology under the outer plastic shells that make the product lighter and improves the breathability and air ventilation.
- Silicon BNS pull tabs for an easy and safe engagement with the BNS.
- Features an adjustable kidney belt system.
- Highly versatile, modular and customizable fit for different forms of off-road riding is made possible by the removable back protector and back puck, the removable

comfort padding; the v-strap kidney belt and the Cross Lacing Sleeve (CLS).

- Innovative cross lacing system (CLS) for securing sleeves features elastic cord and breathable microfibers to give lightweight and highly customizable fit. CLS significantly reduces risk of arm pump.
- Innovative chest protector backed by technical, EVA shock absorbing material which molds to the rider's body shape.
- Premium, CE certified shoulder and elbow protectors systems feature: thermoformed 3D poly padding for comfort and shock absorption; dual protector cup for excellent flexibility and range of movement.
- Protector cups are asymmetric to offer extended protection surfaces, which are contoured to ensure a close fit to keep the protection located and reduce rotation.
- Detachable back protector can be removed to further enhance

ventilation capabilities or adapted to accommodate BNS.

- Chest and back protectors are constructed from a high performance polymer blend for optimized flexibility and excellent weight saving properties.
- The protector plastic shells are vented and channelled to improve airflow and prevent heat build-up.
- Technical, elastane stretch mesh main construction is highly breathable and retains shape.
- Strategically positioned Cordura panels for durability and abrasion resistance.
- All components engineered for a reduced material construction garment that is extremely lightweight, slim and highly ventilated.
- Convenient silicon BNS pull tabs on shoulders for secure fitment of Alpinestars BNS.
- Premium, auto-locking YKK zips on main frontal closure and detachable sleeves.

YOUTH BIONIC ACTION JACKET

- Elbow and shoulder protectors - EN 1621-1:2012 / Level 1.
- Back protector - EN 1621-2:2014 / Level 1.
- Chest protector - prEN 1621-3 / Level 2.
- New lightweight protection jacket with high adjustability and maximum breathability.
- All components are engineered to offer a highly reduced material construction for a garment that is extremely lightweight, slim and highly ventilated.
- Technical elastane stretch mesh main construction is highly breathable and retains shape and structure, while keeping plates close to the body.
- Versatile and customizable fit with removable upper back and front panel for compatibility with Youth Neck Support (YNS).
- Soft touch YNS puller for convenient and secure engagement of the YNS.
- Plate design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure.
- All panel shells (back, chest, elbows and shoulder) are constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties.
- Plates are ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- Back protector feature three articulated plates to allow for greater flexibility and adaptive back fit in all riding positions. Plates "interlock" in the event of a crash to help reduce risk of injury to the spine area. Back protector is developed in two waist-to-shoulder dimensions in order to cover all the KIDS/YOUTH body sizes from 6-10 and from 10-14 years.
- Thermoformed foam collar and shoulder for comfort and structure.
- All plates are mounted on PE padded panels which are highly perforated to offer fit and skin-touch comfort.
- Elastic kidney with TPR belt system for improved ergonomics and a customized, secure fit.
- Premium auto-locking YKK zips for main front closure, plus zip garage for improved comfort.

- Plate design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure. Shells are highly perforated for maximum breathability and air ventilation.
- All panel shells (back, front, elbows and shoulder) are constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties.
- Plates are ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- Wide lateral protective structure for secure fitting of jacket.
- Soft bio foam padded chassis for maximum comfort and personalized, close-to-the-body fit.
- Side adjustable kidney belt allows for various fit sizes and ensures protection remains close the body at all times.
- Back removable section to accommodate Alpinestars' new Youth Neck Support.
- Adjustable shoulder straps for close, customizable fit.

**EASY INTEGRATION WITH
THE YOUTH NECK SUPPORT
AND SEQUENCE YOUTH NECK ROLL**

YOUTH NECK SUPPORT

- CE certified - Cat 2 PPE 89/686/EEC.
- Designed and developed for a fit that is specific to a youth rider's anatomy.
- Frame constructed from injected polymer compound that has been extensively impact tested at performance on a range of off-road surface and varying temperatures.
- Frame has been ergonomically engineered to promote contact with the helmet during impact – including rear support edge that fits closer to the body and raised chest to avoid hyper-flexion injuries - thus providing a solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the support.
- Frame's anatomical profile promotes positive helmet contact in event of a crash while allowing rider freedom of movement.
- Rear stabilizer system helps keeps support in position

and is also designed to channel extreme energy loads away from the spine by transmitting it across the shoulder and helping to avoid serious spinal injury.

- Ultra-lightweight EVA foam on the support's underside for comfort and positioning and to distribute the impact force over the widest possible area.
- A new closure system for convenient engagement of support and to facilitate quick removal in case of emergency.
- The support is supplied with the easy-to-use strap system which allows use over or under the jersey to secure the device on the rider.
- The Youth Neck Support can be easily integrated with the A-5S Youth Body Armour to ramp up a young rider's overall protective coverage.

EASY INTEGRATION WITH
THE YOUTH BIONIC ACTION JACKET
AND A-5 S YOUTH BODY ARMOUR

SEQUENCE YOUTH NECK ROLL

- New hybrid children's neck protection with extended tail for position stability.
- Ergonomic designed and engineered shape to fit kids from 6-10 yrs. and from 10-14 yrs.
- Double density core is made from a soft PU foam base embedding a hard layer EVA for energy dissipation.
- Bottom and internal soft section (neck side) provides comfort for the shoulders and neck, a hard section on the upper part to give

stability and provides force distribution when the helmet impacts.

- Easy to use soft strap closure on the front part.
- Highly compatible with all other Alpinestars protectors and jackets.
- External cover can be removed for washing by hook and loop grip opening on the rear.

EASY INTEGRATION WITH
THE YOUTH BIONIC ACTION JACKET
AND A-5 S YOUTH BODY ARMOUR

SX-1 YOUTH KNEE PROTECTOR

- Knee protector - EN 1621-1:2012 Level 1.
- Extremely lightweight knee protection with large protective area for riders looking for most breathable and lightweight solutions on all riding styles.
- Upper and lower frames are constructed from a high performance polymeric material blend for optimized levels of flexibility and strength as well as excellent weight saving properties.
- Polymer upper and lower frames are strategically perforated for maximum breathability and air ventilation.
- The protector plastic shell integrated dual pivot hinge gear system follows the natural movement of the knee and keeps the protector well positioned in all riding positions.
- Upper extended frame for increased thigh protection without compromising mobility.
- Innovative knee cup system construction features "floating" protection cup for continuous coverage and mobility, regardless of leg position.
- Knee cup system is constructed from energy absorbing viscoelastic PU foam that is backed by soft padding for an adaptive fit with breathable air mesh for ventilation and comfort.
- High abrasion resistant fabric on the outer central knee cup area reduces the possibility of scratching.
- Thermoformed foam backing for excellent comfort against the skin.
- Frames are asymmetrical and feature a slim, ergonomic design for comfort and performance fit.
- Hook and loop dual strap closure system with silicon Pull Tabs for easy in and out and a personalized, safe fit.

BIONIC PLUS YOUTH ELBOW PROTECTOR

- Elbow protector - EN 1621-1:2012 Level 1.
- CE-certified protection systems utilizing robust protective structures and impact absorption padding.
- Highly ergonomic design improves streamlining while providing crucial protection for MX and off-road riding.
- Double closure system on Elbow Protectors specially designed to offer more comfort and adjustment, with top strap mounted above the elbow and lower strap positioned for ergonomic fit.
- Asymmetrical and lightweight ergonomic panel construction offers extended protection surfaces to reduce rotation.
- Vented outer shell and 3D mesh material give comfort to the rider, preventing heat build-up while maintaining tactile contact with skin.
- Designed with a flexion channel through the shell that allows the shell to bend with the elbow.

SEQUENCE YOUTH KIDNEY BELT

- Ergonomically designed for maximum stability around the waist and lower back.
- Lightweight and flexible lower back shell construction provides the perfect balance of support, impact protection and flexibility for highest comfort when riding.
- The TPR CELL structure of the main panel is flexible to allow the ease of movement. The properties of the CELL structure mean the belt is also highly breathable and allows for maximum airflow.
- Perforations in the waist straps, back main elastic bands and the 3D mesh behind the main CELL structure provide extra ventilation.

B O O T S

TECH 10 BOOT

SIZE | US 7-14 / EUR 40.5-49.5

- New performance double pivot motion control system features:
 - Medial and lateral double pivot system for improved levels of flexibility and precision control.
 - Engineered front flexion control offered by a dual front blade system plus shock absorber insert to offer mechanical progressive force release which dampens and absorbs impact energies.
 - Redesigned dual density TPU rear blade system engineered to prevent hyperextension while offering improved flex control and impact resistance.
- Built into the Tech 10's unique and lightweight single-piece co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded poly-foam to absorb high impact energies during a crash. DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg. DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.
- Co-injected for strength and structure exclusive TPU and rubber compound panels

provide superb levels of grip contact, durability and heat resistance. Innovative material construction ensures panels are lighter, anatomically profiled and reduced in thickness.

- The contoured calf protector ergonomically wraps around rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces. Shin plate features new anatomic design for reduced surface area and weight-saving.
- Completely redesigned sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off. Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support. The sole offers superior durability, grip and feel while riding and improved performance on shifter. The central sole insert features micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.
- Anatomically optimized redesigned for weight-saving and ergonomics the new mechanical buckle closure system feature a nylon and fiberglass compound for improved durability and strength. New slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength. The buckle closure system features a

memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.

- Innovative, lightweight upper combines advanced lightweight microfiber and impact and abrasion resistant TPU shell.
- Footshell features five different compounds in a single lightweight piece to offer strength while maintaining flexibility and structural integrity. Foot shell incorporates heel and toe protection is highly resistant to abrasion and impact, and adds to the boot's overall durability. Foot shell also includes integrated shank for support and structural integrity.
- Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure attached securely with a micro-adjustable, easy to operate, lightweight buckle. Shin incorporates a unique TPU blade system engineered to prevent frontal hyperextension and offer greater flex control.
- Soft microfiber gaiter helps seal out excessive water and dirt entry.
- Poly-fabric lining with 3D open cell foam incorporates anti-sliding suede on heel area to keep foot located inside the boot.
- Tech 10 boot is CE certified to EN 13634:2017.

**REDESIGNED
BIOMECHANICAL
INNER ANKLE BRACE
SYSTEM**

- Lighter, anatomically redesigned medial and lateral torsion bars for ankle and leg rotation and progressive damping of torsional forces during an accident, while still allowing natural freedom of movement.
- New low-profile, pull-on design for reduced material build, less weight and to facilitate easier and quicker wearing.
- Innovative flexion inserts work seamlessly with new Tech 10's flex support system for ultimate in performance.
- TPU protection and shock absorbing padding on the heel and ankles and an ultra-thin and flexible forefoot area for increased sensitivity and control.
- Dual compound removable anatomic footbed includes EVA for comfort and support and aids even weight distribution.

TECH 8 RS BOOT

SIZE | US 5-15 / EUR 38-51

- Upper constructed from a combination of full grain leather and innovative and light microfiber that is flexible and abrasion resistant.
- Alpinestars inner ankle sleeve is constructed from leather with 3D mesh panels and incorporates adjustable shock absorbing gel inserts on the ankles and a removable anatomic footbed for enhanced comfort, fit and protection on the ankle and lower leg.
- Alpinestars exclusive high grip, dual density rubber outsole includes footpeg area which is reinforced with hard polymer compound for durability and comfort. The outsole is fully replaceable.
- Reinforced lateral flex zone above outward facing ankle helps prevent torsion.
- Contoured shin plate injected with high modulus polymer for superior impact and abrasion resistance is perforated for ventilation.
- Contoured calf protector plate is injected with high modulus polymer for impact resistance.
- Extended, internal protection plates constructed from injected polymer to guard the ankle and lower foot as well as the toe box area.

- Advanced closure system features strong techno-polymer buckles for easy adjustability with a precise, secure and streamlined fit.
- Top and bottom reverse closure design provides superior impact security and improved fit.
- Low profile toe for improved control and sensitiveness in the shift area.
- Full length, sculpted rubber panel on the inner side of the boot gives superb grip against the bike and is insulated with aluminum foil for improved heat resistance.
- Instep and Achilles flex zones for superior comfort, control and support.
- Replaceable kick starter protection insert located on the right boot.
- Stamped steel sole and heel guard.
- Soft, polymer gaiter provides effective seal around the top of the boot, preventing excessive water and dirt entry.
- Breathable 3D tech mesh lining reduces heat buildup and improves comfort.
- Contoured tempered steel shank is over injected inside the

mid sole assembly for rider safety and support.

- New buckle closure system includes polymer buckles plus aluminum frame with innovative self-aligning quick release closures.
- All buckles are replaceable.
- Full inner bootie is constructed with 3D breathable mesh plus synthetic material chassis for support, plus breathable textile lining on the ankle areas.
- Ankle features perforated soft comfort padding and incorporates adjustable shock absorbing gel inserts on the ankles. Gel inserts are replaceable.
- Dual compound, removable anatomic footbed features polymer forefoot plus EVA arch support and top textile lining for support and comfort.
- Replaceable footpeg insert on sole is constructed from hard compound vulcanized rubber for durability and protection.
- Tech 8 RS boot is CE certified to EN 13634:2010.

TECH 7 BOOT

SIZE | US 5-16 / EUR 38-52

- Lightweight upper combines suede leather with lightweight microfiber for impact and abrasion resistant TPU shell.
- Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for comfortable, highly customized closure.
- Soft microfiber gaiter helps seal out excessive water and dirt entry.
- Evolutionary design for lateral flex zone provides front and rear flexion support and helps prevent torsion.
- Medial-facing panel constructed from TPU with rubber insert for maximum grip contact with bike and improved heat and abrasion resistance.
- Contoured TPU calf protector plate offers impact resistance.

- Extensive TPU protection on toes, foot, heel, ankle, calf and shin with extra hard compounds on the toe-box, heel and achilles tendon.
- New closure system includes polymer buckles plus aluminium frame with innovative self-aligning, quick release closures for customized secure fitment.
- All the buckles are replaceable.
- TPU lower shell is reinforced with metal shank and includes toe reinforcement for impact and abrasion resistance.
- Poly fabric lining with 3D open cell foam incorporates anti-sliding suede reinforcement on heel area.
- Exclusive dual compound sole is seamlessly integrated to the multi-density foot

- base structure with built-in support; the sole superior durability and grip.
- Main flexion of the boot is supported around medial and lateral ankle by low profile pivot system which all dissipates the friction when bending the boot.
- Shock absorbing padding on the heel and ankles plus an ultra thin and flexible forefoot area for increased sensitivity and control.
- Removable anatomic footbed in lycra on top.
- Replaceable footpeg insert on sole is constructed from hard compound vulcanized rubber for durability and protection.
- Tech 7 boot is CE certified to EN 13634:2010.

TECH 5 BOOT

SIZE | US 5-16 / EUR 38-52

- Upper constructed from innovative and light microfiber material with action leather on toe box.
